Nova Pro Cucina

Perfect organisation for inside the drawer

Elegant design and top-grade materials – a combination which cannot fail to impress. The modular system Nova Pro Cucina will help you find the perfect arrangement for the contents of your drawers and high-fronted pull-outs.

The inside arrangement – Tidiness is a virtue

Nova Pro Cucina is a flexible system of drawer organisers for the drawer slide system Grass Nova Pro. Different modules can be individually combined to ensure an optimal arrangement of all the available space. And what's really ingenious about Nova Pro Cucina is the fact that it provides a tidy solution for both drawers and high-fronted pull-outs. This means that you and your customers have matching, top-class looks and functionality throughout your entire kitchen.

Different modules for different applications

The variety of available options allows you to choose the organisers to suit the items you wish to store in the drawer. For the optimum arrangement of drawer contents, spice rack inserts, kitchen roll dispensers for foil and tissue or different spice shaker inserts provide a host of combinations to ensure that the best possible use is made of the available space. The requirements for maximum flexibility in the area of high-fronted pull-outs are perfectly met by the organiser system based on a perforated base plate in stainless steel. Pots and pans or plates can be accommodated without any problem using the post inserts which come in a choice of stainless steel or maple. In addition, all the modules in the Nova Pro Cucina system are

available in two lengths (450 and 500 mm) as well as different widths.

The exclusive use of top-grade materials such as stainless steel or elegant maple under-lines the quality of this system and at the same time enhances the intrinsic value of the kitchen as a whole.

Nova Pro Cucina

Perfect organisation for inside the drawer

Nova Pro Cucina for drawers

For drawers the range includes different modules for storing herbs and spices. The rack inserts, like the spice containers, are made of top-grade stainless steel. The lids for the spice containers come in a choice of various types in stainless steel or glass depending on the application. And there is also a rack insert for use with commonly sold spice jars, e.g. those made by Ubena and Fuchs. A kitchen roll dispenser in a combination of maple and stainless steel is also available to take rolls of kitchen tissue and foil.

Nova Pro Cucina for high-fronted pull-outs

For the optimum arrangement of high-fronted pull-outs, Nova Pro Cucina provides perforated base plates with fixed hole spacing. Post inserts which can be quickly moved without the need for tools ensure a flexible division of the space within the drawer. That means pots and pans, plates and plenty more besides can all have their permanent place. The post inserts come in elegant maple or solid stainless steel.

Simple fitting in two easy steps

1 Determine the inside width of the drawer

Before you begin to select your Grass Nova Pro Cucina modules, determine your cabinet inside drawer width

Example

Outside cabinet width 900 mm, cabinet side wall thickness 16 mm

Calculation of the inside drawer width

Outside cabinet width	900 mm
Cabinet side wall (2 x 16 mm)	- 32 mm
Nova Pro installation dim.	- 58 mm
Tolerance compensation	- 2 mm

Inside drawer width 808 mm

2 Select the modules:

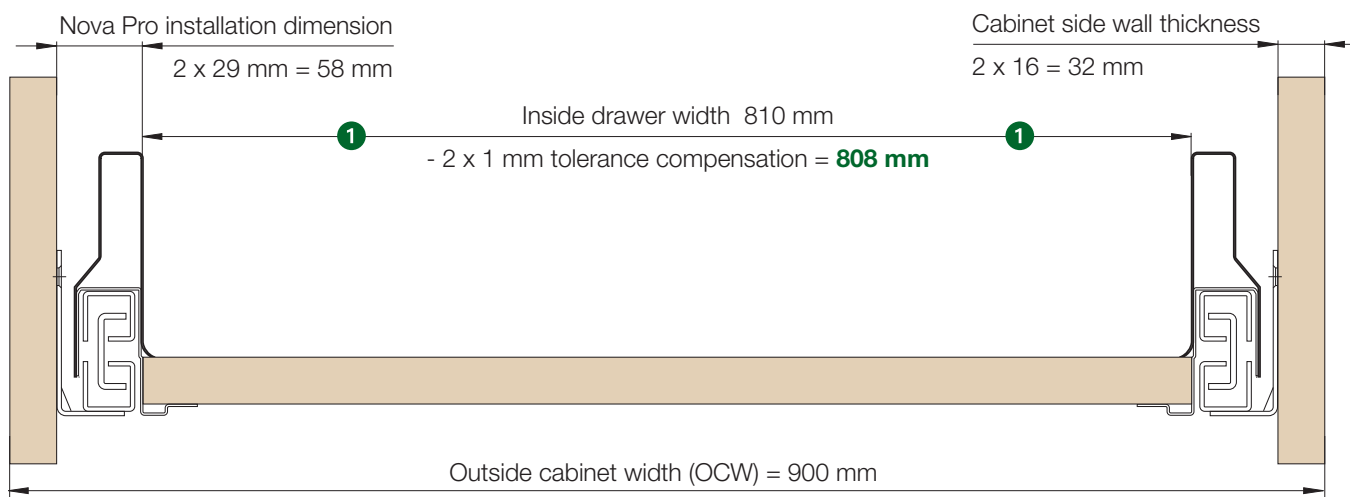

Combine the modules of your choice. Make sure that the total widths of the modules you select add up to the inside drawer width you have previously calculated.

Example

Spice containers

Kitchen roll dispenser

Spice rack insert

Your inside drawer width for Nova Pro Cucina

Cabinet side wall thickness	Outside cabinet width									
	300	400	500	600	700	800	900	1000	1100	1200
16 mm	208	308	408	508	608	708	808	908	1008	1108
19 mm	202	302	402	502	602	702	802	902	1002	1102
